

SALIENT

Safer, Lighter, Circular, Smarter

Changing the future of Front-End Structure design & vehicle safety!

SALIENT in a nutshell

SALIENT is an EU-funded Research & Innovation Action (RIA) developing a future-proof lightweight Front-End Structure (FES) design for the automotive industry.

Duration

From 1 September 2022 to 31 August 2025.

Visit our website and find out more

How to achieve this?

SAFER:

New vehicle designs, innovative use of energy-absorbing materials.

CIRCULAR:

Application of eco-design principles for economic & environmental sustainability.

LIGHTER:

Use of advanced light materials, adaptable to different crash configurations.

SMARTER:

Optimised design of the crash box to minimise impact in vehicle crashes.
